

Comment: JMA cuts the filenames build by <station>_<date>.nc after 34 characters.

(Moscow_University_Station_200709270600.nc) ->

Moscow_University_Station_20070927)

If there is a reason for that some of the names have to be shortened. Also some names

contain special characters like '. These names have to be changed too. Here is the

list with 173 station names and proposals for changes.
