

## ScalES-PPM - Bug # 342

<b>Status:</b>	New	<b>Priority:</b>	Normal
<b>Author:</b>	Matthew Krupcale	<b>Category:</b>	
<b>Created:</b>	09/25/2017	<b>Assignee:</b>	
<b>Updated:</b>	10/14/2017	<b>Due date:</b>	
<b>Subject:</b>	autoreconf fails due to missing file m4/ac_fc_module_output_flag.m4		
<b>Description</b>			
<p>When attempting to run autoreconf on ppm-1.0.4, aclocal fails with error:</p> <pre>aclocal: error: acinclude.m4:52: file 'm4/ac_fc_module_output_flag.m4' does not exist</pre>			
<p>Indeed, the file does not appear to be in the m4 directory shipped with ScalES-PPM v1.0.4.</p>			
<p>Furthermore, acinclude.m4 attempts to include this file only if the autoreconf version is less than 2.70 (which does not yet exist), but AC_FC_MODULE_OUTPUT_FLAG was introduced in version 2.69 (specifically commit ac427166c5945445e307c82d44301da9480f017a).</p>			
<p>The attached patch fixes these two issues.</p>			

### History

#### #1 - 10/14/2017 05:29 pm - Matthew Krupcale

- File scales-ppm-1.0.5-ac\_fc\_module\_output\_flag.patch added

The latest release of 1.0.5 fixes the first issue noted regarding the absence of the file m4/ac\_fc\_module\_output\_flag.m4, but this file only should be needed if the detected autoreconf version is less than 2.69, not 2.70.

The attached patch is updated for the latest release 1.0.5 to fix this issue.
