

ScalES-PPM - Bug #346

Failure to apply doxygen CSS patch when building HTML documentation

09/25/2017 07:53 PM - Matthew Krupcale

Status:	Feedback	Start date:	09/25/2017
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
After applying the patches in #342 and #345 , running autoreconf -vif to rebuild the configure and Makefiles, configuring the project and running make -C doc/unitdoc html-local, from the top build directory to build the HTML documentation, make fails when building the target html-local when applying the final patch to the CSS: <pre>patch -p1 <../../../doc/unitdoc/doxygen.css.patch patching file html/doxygen.css Hunk #1 FAILED at 944. 1 out of 1 hunk FAILED -- saving rejects to file html/doxygen.css.rej</pre> This might be due to a different version of doxygen being used and producing different CSS, but I have fixed this issue by creating a new doc/unitdoc/doxygen.css.patch file. The attached patch fixes this patch file at least when using doxygen version 1.8.13.			

History

- % Done changed from 0 to 100

- Status changed from New to Feedback

Resolved in commit:bf60175c0f0 part of release 1.0.6. Hopefully, similar errors will not come up in the future since the new method does not rely on patching.
