

ScalES-PPM - Bug # 346

Status:	New	Priority:	Normal
Author:	Matthew Krupcale	Category:	
Created:	09/25/2017	Assignee:	
Updated:	09/25/2017	Due date:	
Subject:	Failure to apply doxygen CSS patch when building HTML documentation		
Description			
<p>After applying the patches in #342 and #345, running autoreconf -vif to rebuild the configure and Makefiles, configuring the project and running</p> <pre>make -C doc/unitdoc html-local,</pre> <p>from the top build directory to build the HTML documentation, make fails when building the target html-local when applying the final patch to the CSS:</p> <pre>patch -p1 <../doc/unitdoc/doxygen.css.patch patching file html/doxygen.css Hunk #1 FAILED at 944. 1 out of 1 hunk FAILED -- saving rejects to file html/doxygen.css.rej</pre> <p>This might be due to a different version of doxygen being used and producing different CSS, but I have fixed this issue by creating a new doc/unitdoc/doxygen.css.patch file. The attached patch fixes this patch file at least when using doxygen version 1.8.13.</p>
